

Physiology Seminar Series

Spring 2003

Graduate School of Biomedical Sciences

• The University of Texas Health Science Center at San Antonio •

- **Richard Kramer, Ph.D.** Univ California-Berkeley **January 6**
Regulation of phototransduction in retinal rods: More than meets the eye
- * **Joseph Yost, Ph.D.** Huntsman Cancer Inst. **January 13**
Cell Signaling Mechanisms that Establish Left-Right Asymmetry in Vertebrates
- **David Bader, Ph.D.** Vanderbilt University **February 3**
Bves: A Novel Cell Adhesion Molecule and its Role in Embryogenesis
- **Meredith Bond, Ph.D.** Cleveland Clinic Foundation **March 3**
Downstream regulation of the beta-adrenergic pathway in the heart - Role of A-kinase anchoring protein
- † **Jian Yang, Ph.D.** Columbia University **March 6**
The Yin and Yang of PIP2 Regulation of Voltage-Gated Ca²⁺ Channels
- **Shai Silberberg, Ph.D.** NIH/NINDS **March 17**
To be Announced
- **L. Jackson Roberts, Ph.D.** Vanderbilt University **March 24**
Isoprostanes and Related Compunds: Unique Bioactive Products of Lipid Peroxidation
- **Mark Steinhelper, Ph.D.** UTHSCSA **April 7**
To be Announced
- **John Adelman, Ph.D.** Vollum Institute **April 21**
Structure, Function, and Physiological Roles of Small Conductance Ca²⁺-Activated K⁺ Channels
- **John Osborn, Ph.D.** University of Minnesota **April 28**
The Brain, the Kidney and Salt-Dependent Hypertension: Is There a Unifying Theory?
- **Stephen Ikeda, M.D, Ph.D** NIH/NIAA **May 5**
RGS Protens and Ion Channel Modulation
- **Patricia Camacho, Ph.D.** UTHSCSA **May 12**
Modulation of Intracellular Calcium Oscillations by ERp57, an ER Thioredoxin

MONDAY SEMINARS ◇ 12:00 - 1:00 PM ◇ **LECTURE HALL 444-445B**

◇ For more information call Sue at 210/567-4324 ◇

† **Special Seminar (Note: Thurs., March 6 from 1:00 - 2:00 in 209L)**
